

ATOME FAMILY

Spiridondeco.com Deco

• WHO ARE WE?

The family Spiridon believes that all projects and ideas could be materialized. We are convinced that originality and quality are not exclusive and that these are two key elements when designing your interiors. That is why we offer a wide range of lightings and the possibility to produce your own personalized chandeliers.

In addition to the collection displayed, any of our model can be modified upon your request. Helped by young designers, our team supports you for any taylor-made product and will guide you through all the step of the creation. Moreover, we offer to the architects and to our professional partner all the help they are needing to make their project a success.

Constantly looking for a perfect consumer experience, we engage ourselves to require from our workshop a dedicated work. Thanks to an exigent selection of our raw materials, the quality of the artisanal manufacture of our products is guaranteed. Our close relationship with our partners allows us to answer quickly to any of your specific needs.

About ATOME...

Let us present you ATOME, an amazing family of lamps evoking bouquets of flowers, sparkling with a thousand lights everywhere. But what makes them so unique?

This is because ATOME is not only a unique visual identity, it's also the product of an original manufacturing process: each of its ball is made from recycled glass, then it is blown and assembled on a thin galvanized metal structure ensuring the perfect curve of our models, with the projection of astonishing sparks of light.

Be amazed by the effects of ATOME!

The main characteristic of our **ATOME** luminaire family is that it consists of an assembly of a multitude of glass balls, fixed on a nickel-plated metal structure.

Two finishes are available for each model of the **ATOME** family: **WB** (clear) and **WM** (mat)
